Imagine Schools Summer Math Challenge 2011

We are pleased to announce that we have an Imagine Schools Summer Math Challenge packet for our students. We encourage all of our ICSAB students to complete this packet over the summer. It is intended to keep us thinking as mathematicians over the summer. It contains many problem solving projects. We are encouraging the students to complete as many projects as they can over the summer.

There will be several prizes awarded for those students who work on the packet. The school prizes will be broken down into different levels:

Gold *level*: for students who complete 17-25 projects (depending on grade level).

Silver *level*: for students who complete 9-20 projects (depending on grade level).

Bronze *level*: for students who complete 1-10 projects (depending on grade level).

Please have your child work on the packet (available below) at their convenience and return it to your child's math teacher the first day of school! If you have any questions, please ask your child's math teacher.

Have a wonderful summer!!!

Sincerely,

The ICSAB Math Team
